PROFESSIONAL SUMMARY

Solution-oriented technical professional with experience designing, deploying, and supporting scalable data and signal-processing systems across client-facing and internal environments. Proven ability to translate complex customer and business requirements into reliable technical architectures, collaborate cross-functionally with sales, engineering, product, and client teams, and deliver high-impact solutions under real-world constraints. Strong background in system integration, automation, analytics infrastructure, and technical troubleshooting, with a foundational understanding of applied AI systems.

CORE SKILLS

Solution Architecture & Systems

- Scalable system design and long-term architecture
- Signal ingestion, validation, and monitoring pipelines
- Platform integrations and automation
- System reliability, QA frameworks, and troubleshooting
- Requirements gathering and technical solution design

Technical Skills (Proficient)

- JavaScript (GTM-focused), CSS, HTML
- REST APIs and third-party integrations
- Google Tag Manager, GA4, server-side tracking concepts
- CRM and advertising platform integrations
- Looker Studio

Familiar With

- Applied AI systems
- Python
- SQL/DB Concepts
- Large Language Models (LLMs) and prompt-based workflows
- Local LLM deployment tools (Hugging Face, Ollama, LM Studio)
- Automation tools (n8n, Zapier)
- Containerization and local infrastructure concepts (Docker, self-hosted services)
- IoT and embedded systems concepts (ESP32-based tooling)
- Front-end frameworks and design tooling (React concepts, Figma)

Client, Project & Collaboration

- Customer discovery and technical requirements translation
- Technical walkthroughs, documentation, and stakeholder communication
- Cross-functional collaboration with Sales, Engineering, and Product
- Project coordination under SLA and delivery constraints
- Client onboarding, support, and issue resolution

PROFESSIONAL EXPERIENCE

Tracking Specialist

Pathlabs (MIQ) — Missoula, MT
January 2024 – Present

- Designed, enhanced, and maintained scalable tracking and signal-processing systems supporting enterprise and client-facing deployments.
- Architected enhancements to a **Tag Monitoring System** to proactively detect signal degradation across platforms, improving reliability and data integrity.
- Built automated data ingestion and validation workflows using **Google Apps Script**, reducing manual overhead and improving long-term maintainability.
- Led a full overhaul of conversion and signal architecture integrating **HubSpot**, **Google Ads Enhanced Conversions**, and downstream platforms, delivering a **13.4% increase in conversion rate**, **43% reduction in cost per conversion**, and **25% reduction in MQL cost** within two months.
- Served as subject matter expert for advanced platform integrations, including **Google and Facebook server-side/CAPI implementations**.

- Acted as a technical liaison between clients, internal stakeholders, and partner teams to scope requirements, design solutions, troubleshoot issues, and ensure accurate execution.
 - Integrated new partner platforms into existing tracking systems, broadening measurement capabilities and supporting additional client use cases.
 - Supported agile workflows, sprint planning, and iterative delivery across evolving priorities.
-

Tracking Coordinator

Pathlabs (MIQ) — Missoula, MT

May 2023 – January 2024

- Supported and managed complex tracking implementations across **100+ client accounts**, improving measurement accuracy and operational efficiency.
 - Performed deep QA across live environments to ensure end-to-end signal integrity and data reliability.
 - Collaborated with cross-functional teams to resolve technical blockers, support launches, and meet delivery timelines.
 - Assisted in documentation, standardization, and process improvement initiatives.
-

Freelance Analytics & Tracking Consultant

Remote

April 2023 – Present

- Designed and implemented scalable analytics, tracking, and signal-processing solutions for **15+ clients** across e-commerce, SaaS, and service-based industries.
 - Led customer discovery, technical scoping, implementation, and post-launch validation, maintaining a **100% job success rating**.
 - Built reusable system templates, automation frameworks, and deployment playbooks, reducing implementation time.
 - Provided ongoing support, troubleshooting, and optimization recommendations to clients post-launch.
-

PROJECTS

Tag Monitoring & Signal Validation System

Designed a scalable monitoring framework to detect, alert, and diagnose signal loss across multiple platforms, improving data reliability and reducing downstream reporting issues.

Conversion & Signal Architecture Optimization

Rebuilt conversion pipelines integrating CRM and advertising platforms, improving attribution accuracy and delivering measurable gains in conversion efficiency and cost metrics.

Flybox App (Personal Project)

- Designing a fly fishing companion application combining digital logbooks with AI-assisted hatch recommendations, leveraging river-specific environmental data to support decision-making.
- Exploring data ingestion, UX/UI design with Figma, and user-focused system design within a niche real-world context.

AI Marketing Intelligence Automation (Client Project)

- Built an automated workflow using **n8n** to scrape and analyze competitor content across LinkedIn, Instagram, and Facebook, generating structured marketing insights for decision-making.
- Integrated LLMs into the pipeline to summarize trends and surface actionable insights, demonstrating applied AI integration in production-style workflows.

Local LLM Deployment & Experimentation

- Deployed and tested large language models locally using **Hugging Face, Ollama, and LM Studio**, exploring model selection, inference workflows, and performance tradeoffs.
- Evaluated local inference as an alternative to cloud-based AI services, focusing on privacy, cost control, and system flexibility.

EDUCATION

University of Montana — Missoula, MT

Bachelor's Coursework: Business Management & Entrepreneurship

Certificate: Entertainment Management

Additional Coursework & Training:

- Business Intelligence & Data Analytics (CFI)
 - Google Analytics Certification
 - Google Tag Manager Certification
-

LEADERSHIP & RECOGNITION

- Recognized with **283 peer “Shoutouts”** in **2025** for collaboration, reliability, and cross-team impact.
- Former **NCAA Division I Football Athlete (5 years)** — demonstrates discipline, adaptability, and performance under pressure.
- Active contributor to internal knowledge sharing, documentation, and process improvement initiatives.
- Presented the **Tag Monitoring & Signal Validation System** to the entire company in 2024, explaining system architecture, use cases, and operational impact to both technical and non-technical stakeholders.
- Led a **company-wide tracking system walkthrough and live Q&A session** in late 2025, educating teams on platform capabilities, troubleshooting workflows, and best practices for maintaining data reliability at scale.
